

DESTINATION:
**DEEP
SPACE**

Presented By 

**FIRST®
ROBOTICS
COMPETITION**

Join us for a VIP tour to see *FIRST* Robotics in action

For 30 years, *FIRST*® has inspired millions of young people to reach for the stars. Project-based, hands on *FIRST* programs introduce students to coding, programming and engineering in an environment where students work collaboratively to solve a yearly robotics challenge.

Now you can see all four *FIRST* programs—from *FIRST* LEGO League Jr. through the high school-level *FIRST* Robotics Competition—in person over two weekends right here in the KC region. Join us for a VIP tour as teams from near and far go head-to-head for the chance to advance to Worlds in April. Sign up for a VIP student-led tour to meet team members in the robot pits and watch the excitement from a VIP seating area as teams dive into this year's challenge, Destination: Deep Space.

Don't miss this chance to meet Kansas City's next generation of innovators, technology leaders and change makers to see what they can accomplish here on Earth—and beyond!

RSVP at www.kcstem.info/VIPTour.

Heartland Regional
Olathe South High School
Olathe, Kansas
March 15-16, 2019

Greater KC Regional
Rockhurst High School
Kansas City, Missouri
March 22-23, 2019

See all four programs!
